FOR IMMEDIATE RELEASE

## **NEW ANTI AGING SUPPLEMENT**

### **STEM ENHANCE SUPPLEMENT STIMULATES PRODUCTION OF STEM CELLS THAT ADDRESS EFFECTS OF AGING, INJURY OR DAY-TO-DAY WEAR AND TEAR**

October 15, 2007, Pompano Beach, FL – Why do children recover so much faster than adults? Scientists believe children have more circulating stem cells which are used to repair organs, cells, and tissues. The presence of these stems cells accelerates healing and recovery. For reasons yet to be discovered, aging reduces the release of circulating stem cells, degrading the body's ability to recover quickly from injury or illness. With use of Stem Enhance, a new product supplement from the Pompano Beach, Florida Company, European Solutions, studies have found a significant increase of 25-30% in the number of circulating stem cells released into the blood stream, supporting the aging populations' ability to naturally renew and restore problem areas throughout the body.

The new anti-aging supplement, Stem Enhance has been shown to increase the number of circulating stem cells, producing considerable health advantages.

“Scientists aren't arguing about the benefits provided by stem cells,” says Gloria Brandt, owner of European Solutions, Inc. “But, right now, stem cell therapies are so expensive and until the legalities are sorted out, people can't really benefit from the truly remarkable results of stem cells on the body. People need help now—and Stem Enhance can help them.”

Stem Enhance is sold in bottles of 60 tablets for \$59.95. Stem Enhance is available exclusively online at [www.europeansolutions.net](http://www.europeansolutions.net).
